SUMMARY

AI graduate (B.Sc. Artificial Intelligence) and automation engineer with 1.5 years of experience. Builds Python workflows that combine LLM APIs with data processing to automate internal operations, and ships the surrounding software (.NET / React) and infrastructure (Docker, CI/CD, monitoring).

CORE SKILLS

AI & LLM: LLM API integration, prompt & workflow design, automation pipelines; AI/ML fundamentals
Python: Automation scripts, data processing (Pandas, NumPy), REST API integration
Data: SQL, PostgreSQL, ClickHouse, Excel data handling, validation pipelines
Software: C# / .NET, React + TypeScript, Rust, REST APIs
Operations: Docker, Linux / WSL, CI/CD, monitoring, backups

PROFESSIONAL EXPERIENCE

Web & Database Developer — Hoan Cau Group

June 2025 – November 2026 · 1 yr 5 mos · Ho Chi Minh City, Vietnam

- Built Python + LLM API automation pipelines for data extraction and processing, removing repetitive manual work for management teams.
- Added AI-generated narrative analysis to a data portal, with rule-based fallback when the model is unavailable.
- Engineered data pipelines (Bronze / Silver / Gold) with a Rust parsing core: import, validation and per-row error reporting.
- Delivered the surrounding software and infrastructure: .NET APIs, React UIs, SSO, Docker, CI/CD and monitoring.

SELECTED PROJECTS

LLM automation pipelines
Python · LLM APIs · WSL

- Automated data extraction and processing workflows for management teams.

Data pipeline & lakehouse
Python · Rust · ClickHouse · PostgreSQL

- Import, validation and analytics pipeline with AI narrative and automated tests.

Platform engineering
.NET · React · Docker · CI/CD

- Authentication, reporting and project-data platforms shipped to production.
