SUMMARY

Full Stack Developer with 1.5 years of experience building and operating enterprise web platforms. Delivers end-to-end across .NET (ABP Framework), React + TypeScript, SQL Server and Docker/Linux with CI/CD and monitoring. Shipped reporting, single sign-on (OpenID Connect) and data platforms to production. AI graduate.

EDUCATION

Bachelor of Artificial Intelligence
Van Lang University
2023 - 2026

LANGUAGES

Vietnamese: Native

English: Elementary

SOFT SKILLS

- Self-learning & adaptable
- Teamwork & collaboration
- Technical problem-solving
- Clear written communication

PROFESSIONAL EXPERIENCE

Web & Database Developer — HOAN CAU GROUP

June 2025 – November 2026 · 1 yr 5 mos · Ho Chi Minh City, Vietnam

- **Full-stack:** Built platforms end-to-end — .NET (ABP) APIs, React + TypeScript UIs and SQL Server — including an enterprise reporting platform and a project-data platform, both in production.
- **Identity & SSO:** Implemented central single sign-on with **OpenID Connect / OAuth2**: PKCE flows, service-to-service access, role-based permissions, session management and audit logging.
- **Data platform:** Built a Medallion **data lakehouse** (ClickHouse, PostgreSQL, S3) with a Python API, Svelte UI and a **Rust** core for file parsing & export; sharded CI cut test time by ~65%.
- **DevOps:** Operated dev / UAT / production on Docker & Linux: CI/CD with test gates, monitoring, alerting, backups and rollback-safe releases.
- **AI & automation:** Python and LLM-API workflows that remove repetitive manual processing for management teams.
- **Ownership:** Coordinated an internal platform rollout across branch offices and reported progress to management.

SELECTED PROJECTS

Enterprise reporting platform

ABP / .NET · React · TypeScript · SQL Server · Docker

- Period reporting for **dozens of entities**: data import & validation, approval workflow, dashboards.
- Three-environment delivery with automated tests, health checks and backup/restore procedures.

Central authentication (SSO) service

ABP / .NET · OpenID Connect · OAuth2 · SQL Server

- Single sign-on, RBAC, session and audit management for internal applications.
- Service-to-service APIs (user lookup, application members) used by other systems.

Data lakehouse & analytics

Python · Rust · ClickHouse · PostgreSQL · Svelte

- Medallion-style pipeline with REST APIs, dashboards and automated tests.

TECHNICAL SKILLS

Languages:	C#, TypeScript / JavaScript, Python, Rust, SQL, Bash
Backend:	.NET (ASP.NET Core), ABP Framework, Entity Framework Core, REST APIs
Frontend:	React, Svelte, Vite, HTML5, CSS3, responsive design
Data & Storage:	SQL Server (T-SQL), PostgreSQL, ClickHouse, S3, Pandas / NumPy
DevOps:	Docker, Linux, Git, CI/CD, reverse proxy, Prometheus & Grafana, backup & restore
Auth & Security:	OpenID Connect / OAuth2, PKCE, RBAC, audit logging
AI & Testing:	LLM API integration, Python automation · xUnit, Vitest, Playwright (CI gates)
